Mini Miracle Pointer 2

This is a very small device that you can use to send treatments to other people that you point the device at, you can also use it to potentize bottles of blank pills or glasses of water or other carrier material that you point the device at.

It makes any vibrational remedies you want in any potency, and in any power level up to 180 units and immediately sends them to the patient, so there are no pills to take. Built into a case only 80 x 40 x 20 mm and weighing 37 grams, there is only one button to press to initiate a treatment.

To use: Press the red button down and speak the name of any vibrational remedy you want to send. This could be a Homeopathic, Flower, Gem, or Color Remedy, then speak the Homeopathic Potency you want (if any) and the power level. If you want to receive the treatment yourself, turn it around so it points towards you.

Say 30 units if you want the same strength as a remedy from a Homeopathic pharmacy, 60* units if you want it a bit stronger, 90 units if you want immediate results, and up to 180 units if it's a very acute problem, and hold the button down as long as you need to send that treatment, then release it and the treatment will end. *If you don't speak a power level in, the default is 60 units.

This new version with the blue pointer can be used by you to send a treatment to another person in another location using a witness by pointing at that, such as photograph of them, the original version with the black pointer cannot do that. You can also use the device to send a Prayer to a picture or a statue of your deity whoever that may be. In addition, this version has an internal memory, so to send the same treatment again, press the red button again and do not say anything. To erase the internal memory of remedy or treatment information, press the red button and say ERASE in English, or EFFACER in French, or LOSCHEN in German, or BORRAR in Spanish, or CANCELLARE in Italian, or APAGAR in Portuguese or whatever it is in your language.

It is highly recommended that users have some knowledge of Homeopathy and vibrational medicine, so they will know what remedies to take for the condition they are attempting to treat. The device requires no batteries as it is powered by Universal Energy that will never run down.

Cautions: The device is not watertight so please do not submerge it in water. Placing the device next to a magnet may destroy it and it will not be repairable. Also please make sure children do not play with it, this is not a toy and they could harm themselves or someone else by pressing the button and saying something. If this happens we are not responsible for any harm that occurs, that is the sole responsibility of parents.
